

## APPLICATIONS

- Bottles, Cups, Tumblers, Glassware
- Tins, Cans, Containers, and Paper Tubes for Packaging

## SPECIFICATIONS

### Print System

- DOD piezo electric grayscale print heads, automatic voltage and temperature control
- Multiple UV-LED curing control system
- Automatic print head maintenance system for purging, wiping and capping

- 1L main ink tank for each color
- Automatic ink supply system
- Active negative pressure system

### Connectivity

- Gigabit Ethernet interface

### Media Type

- White, black, colored, or clear materials
- Tapered or cylindrical objects
- Metal, paper, plastic, wood, glass, etc.

### Formats

- Popular desktop file formats, including JPEG, TIFF, PDF, EPS and DCS

### Ink System

- UV curable inks
- 6-Channel Model: W+CMYK+V
- 7-Channel Model: P+W+CMYK+V
- 10-Channel Model: W+CMYKLcLmOrGr+V
- 11-Channel Model: P+W+CMYKLcLmOrGr+V

### RIP and User Interface

- ColorPRINT Bottle RIP software
- Color LCD Display Panel
- Printer Control Software (PCS)

### Operational Environment

- Temperature: 16-28°C (61-82°F)
- Humidity: 40-70% (Recommended)
- Altitude: up to 1000 m (3281 ft)
- Electrical: single phase 220 V±10% (50/60 Hz, AC); 15 A; 3300 W

Printer Model		RotaSpin BD Pro
Printed Object	Shape	Tapered or Cylindrical Objects
	Size	Length: 0 - 360 mm (0" - 14.17") Top diameter: 50 - 130 mm (1.97" - 5.12") Bottom diameter: 50 - 130 mm (1.97" - 5.12")
	Angle	-4.5° to 11°
Rotary Degree of Object		360°
Printable Size		Feeding direction (R-axis): entire surface of the objects Printing length (Y-axis): within 330 mm (12.99")
Printer Dimensions (W x D x H)		2351 mm x 1049 mm x 1886 mm (92.6" x 41.3" x 74.3")

### Printing Productivity\* of 6-Channel Model

Tube Diameter	Image Size	Resolution	Color Mode	Standard Mode		Quality Mode	
				Sec./ 2 pcs	Qty. / hr.	Sec./ 2 pcs	Qty. / hr.
73 mm (2.87")	229 mm x 170 mm (9.02" x 6.69")	600 x 900 DPI	CMYK	12	600	14	514
			W + CMYK	13	554	15	480
			W + CMYK + V	27	267	31	232
			P + W + CMYK + V	33	218	40	180
		600 x 1200 DPI	CMYK	13	554	16	450
			W + CMYK	14	514	18	400
			W + CMYK + V	28	257	36	200
			P + W + CMYK + V	37	195	46	157

\* Print Productivity will vary depending on print resolution, color modes, curing time, image size, etc., excluding loading and unloading time.

## ROTA SPIN BD PRO UV INKJET PRINTER

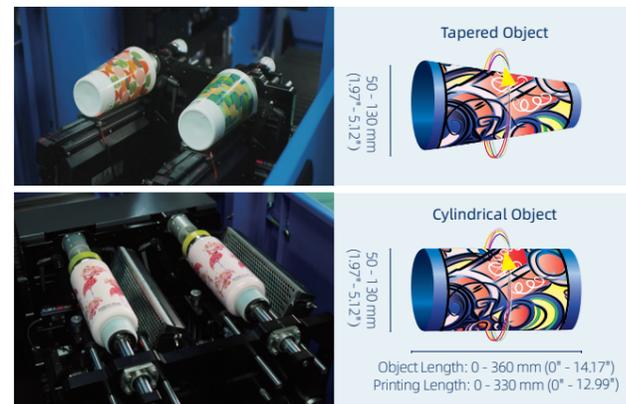

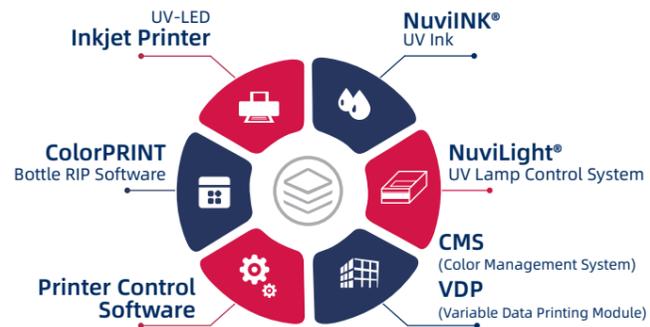

### 360° Seamless Tapered Object & Cylinder Printing

The **ROTA SPIN BD Pro** is designed for 360 degree seamless printing onto cylinders or tapered objects, such as bottles, cups, tins, and cans. As an industrial direct-to-object UV-LED inkjet printer, the RotaSpin BD Pro with dual operation stations that can print and cure simultaneously improves production efficiency.

With the benefits of a streamlined workflow and easy operation, the RotaSpin BD Pro is ideal for a wide variety of applications including short- & medium- run printing, customized printing, and personalized printing.

## Complete Digital Printing System

The RotaSpin BD Pro with dual stations accomplishes high-efficiency production without compromising the printing quality.

- Two objects can be loaded, printed, cured, and unloaded at the same time.
- Two different graphics or images can be printed on a pair of objects at the same time.
- Different custom fixtures can accommodate objects of different shapes and sizes.

**Automatic Print Head Protection System** monitors whether the print heads will be scratched or exposed to UV lights, ensuring the safety of print heads.

The compact **Print Head Maintenance Module** allows automatic purging, wiping and capping for convenient unattended operation.

**Automatic ink supply system** monitors and controls ink levels of the main and sub ink tanks with liquid level sensors. (The above photo for 11-channel model)

## Color Management

The color management system ensures that the RotaSpin BD Pro easily outputs accurate, vivid, and consistent colors in less time on tapered or cylindrical objects.

- **Orange and green inks** reproduce bright and vibrant yellows, reds, purples, blues, while maintaining smooth gradients. (Only available on 11-channel model)
- **Light cyan and light magenta inks** well present smooth gradations and light tones without graininess. (Only available on 11-channel model)
- **Varnish printing** offers amazing tactile and visual effects to grasp viewers' attention, while also providing better adhesion.
- High-density **white ink printing** delivers exceptional image quality on transparent, colored or black materials.
- The feature of **spot color** meets stringent brand requirements while printing corporate logos and recognizing colors.

## Perfect 360° Seamless Rotary Printing

Innovative rotary printing technology for tapered objects and cylinders. A variety of proven and creative printing methods and algorithms are integrated into the RotaSpin BD Pro to achieve high-quality output.

• Thanks to the **Rotational Print Pass Method (RPPM)** and **Special Print Head Arrangement Method**, the RotaSpin BD Pro is endowed with amazing print productivity and print quality for tapered objects and cylinders.

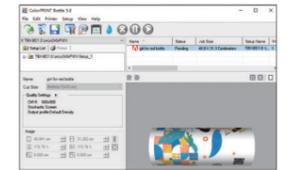

• **Ink Droplet Compensation Algorithm** for tapered object printing ensures even image density on different sections of the tapered object and avoiding image deformation.

## Professional Software for Tapered Object & Cylinder Printing

### ColorPRINT Bottle RIP Software

- Intuitive main interface with 2D/ 3D preview
- Object template to define print locations
- ICC color management
- Automatic white ink background choke
- Basic parameters can be set in one view
- Variable Data Printing

### Printer Control Software (PCS)

- Interactively controls the printer, monitors printer status, and sends job control commands
- Visually displays printing and curing status of jobs at the two stations in real time
- White Ink Circulation Control
- Check Nozzle Circular; Horizontal Calibration
- Multiple UV Lamp Control

• **Embossed printing** builds up raised layers of ink for overall or only appealing parts on tapered or cylindrical objects.

• **Double-sided printing** on transparent materials achieves accurate registration.

• **Ink Droplet Conversion Algorithm** ensures consistent visual density effects of the same image on objects of different sizes.
